Dewey Decimal Classification System of Organization

AB COMMUNICATION

Summary: This book explores the key concepts of communication and culture--including group barriers that make such communication challenging;dimensions of culture;multiculturalism; and women, family, and children--while remaining its unique valuable verbal and nonverbal communication skills, learn to communicate in unfamiliar settings, and recognize culture's influence on self-perception.

Summary: This book covers the history of film from 1895 to the present day. The book is therefore designed to provide students with a narrative history while while simultaneously introducing them to the different approaches to the study and research of film history.

Summary: "The book is unique in presenting such perspectives to all those who deal in diverse areas of communications and focus on the critical issues of development, culture, globalization and information technology etc., in different world societies".

Sparks, Glenn Grayson. Media effects research : a basic overview, Belmont, CA : Thomson/Wadsworth, 2006. 29421 PRO 302.23072 S736m 2006

BIOLOGY

BSC MANAGEMENT

BSC MANAGEMENT/ AB COMMUNICATION

Summary: Effective Crisis Communication: moving from crisis to opportunity provides readers with practical advice on how to effectively manage and overcome a crisis. It's key features are:
Brings together theory and experience; Provides advice on how to create opportunity from crisis and; Addresses prominent and diverse cases.

**COMPUTER ENGINEERING/ ELECTRONICS AND COMMUNICATION ENGINEERING**

**Learning Microcontrollers thru experiments : a step-by-step approach to Z8 design.**

*Summary:* "Learning Microcontrollers thru experiments is an unique book wrote specially for students and engineers who want to learn Microcontroller programming and system design. This book is a practical easy-to-understand experiment book on basic Microcontroller operations. This edition is intended as a reference for all levels in electronics technology courses and training programs, from entry-level introductory courses to review classes. It has a unique approach that concentrates on the application and programming of Microcontrollers using Z8 as examples".

**COMPUTER SCIENCE**

Summary: This book is an in-depth introduction to object-oriented programming using the Java programming language. In addition to covering traditional topics for a CSI course, some of the more advanced topics such as recursion and linked lists are included to provide a comprehensive coverage to beginning to intermediate-level materials.

Summary: This book is for intermediate or experienced programmers who have started developing with ASP.NET and are familiar with relational database such as SQL server. The ASP.NET example code is written in C#.

Summary: This book thoroughly covers features and changes that have been largely undocumented in the marketplace until now, from SP1's critical security enhancements to R2's new management/administration tools, enhanced print controls, and more.

**COMPUTER SCIENCE/ COMPUTER ENGINEERING**
Summary: Developing web applications presents script writing and good programming practice but also allows students to see how the individual technologies fit together. It includes recent technical developments to provide a practical and modern introduction to building web applications.

Summary: "This book is designed for the course on Computer Organization offered to students taking the DOEACC ‘A’ level certificate examination. The book will also be useful to the Diploma students who take a paper on Computer Organization".

**CULTURAL**

**ECONOMICS**

**ELECTRONICS AND COMMUNICATION ENGINEERING**

Cieszynski, Joe. **Closed circuit television.** Boston, MA : Elsevier/ Newnes, 2007. 29288 PRO 621.38928 C569 2004
Summary: This book is a comprehensive guide to the specification, selection, installation and maintenance of closed circuit television for technicians and security managers.

Summary: "A practical easy-to-understand book on basic digital electronics. This book is intended as a reference for all levels in electronics technology courses and training programs, from entry-level introductory courses to review classes. This book concentrates on the application of logic theories in existing digital ICs. The chapters are arranged in the standard order also used by many textbooks for introducing digital electronics, making this book a valuable reference textbook that can help bridge the gap between theory and practical design".

Summary: "Wireless networking technology clearly explains the latest wireless technologies, covering all scales of wireless networking from personal (PAN) through local area (LAN) to metropolitan (MAN). Building on a comprehensive review of the underlying technologies, this practical guide contains 'how to' implementation information, including a case study that looks at the specific requirements for a voice over wireless LAN application. This invaluable resource will give engineers and managers all the necessary knowledge to design, implement and operate high performance wireless networks".

**NURSING**

Summary: This book is organized around the scope and standards for Nurse Administrations with the over-all conceptualization of the four major management functions: planning, organizing, directing or leading, and controlling or evaluating. It is designed for management development of professional nurses in the 21st century.

Summary: This book will help to simplify difficult nursing concepts and make your journey in preparing for the NCLEX-RN FUN and EASY.

**PROFESSIONAL ENGINEERING**

Summary: This hands-on self-teaching guide offers an easy way to understand engineering statistics, explanation on how to use several statistical software programs, including EXCEL, MINITAB, SAS, SPSS, STATISTIX, and MAPLE, real-world examples, exercises at the end of each chapter to reinforce learning and pinpoint weaknesses, two final exams at the end of the book, along with their solutions, a time-saving approach to performing better on an exam or at work.

Summary: Solar Energy Projects for the Evil Genius provides you with complete plans, instructions, parts lists, and sources for: crushed berries solar cell; solar death ray; solar-powered hot dog cooker; solar furnace; sun-powered refrigerator; camping shower, oven, and more; hot recipes for solar cooking; water purifier; flashlight; garden lights; soar vehicle; environmentally friendly robot.

**PSYCHOLOGY**

SPECIAL COLLECTION

TOURISM

Summary: This book contains a collection of Bill’s publications grouped thematically under the headings Methods, Events, Destinations, and Research agenda. The collection of papers in each section demonstrates how Bill’s thinking in the area evolved over time and influenced the intellectual development of the field itself. Each section of the book has an introduction, which helps conceptualize the content and identify key milestones that influenced the works.

Leong, Mary. Do’s and don’ts in Hong Kong. Thailand : Book Promotion and Service Co., Ltd, 2005. 29203 PRO 390.95125 L583d 2005

Summary: Tourism crisis examines some of the most important current issues facing the tourism industry, including the relationship between politics and tourism and politically inspired tourism crises; host-guest relations and tourists as targets of unrest; crises arising from economic uncertainties: natural disasters and health crises; transport accidents and crises due to technical failure; as well as human resource matters and questions of corporate finance.

28786 PRO 915.99 L429p 2005

Summary: This book featuring 32 of the author's published articles, takes you on a nature trip as well as an historical, cultural and religious tour around many of the country’s tourist destinations.
